EXPERIMENT 14

CS23334 – FUNDAMENTALS OF DATA SCIENCE LAB

Feature Scaling

Aim: Apply StandardScaler and MinMaxScaler to numerical features.

Python Program

```
import pandas as pd
from sklearn.preprocessing import StandardScaler,MinMaxScaler
df=pd.read_csv('pre-process_datasample.csv')
df['Age']=df['Age'].fillna(df['Age'].mean())
df['Salary']=df['Salary'].fillna(df['Salary'].mean())
x=df[['Age','Salary']]
print(StandardScaler().fit_transform(x))
print(MinMaxScaler().fit_transform(x))
```

Result

StandardScaler standardizes values; MinMaxScaler scales values between 0 and 1.

Note: For CSV programs, keep the named CSV file in the same folder and check that column names match.
