EXPERIMENT 3

CS23334 – FUNDAMENTALS OF DATA SCIENCE LAB

Line, Bar and Pie Charts

Aim: Visualize sample data using line, bar and pie charts.

Python Program

```
import matplotlib.pyplot as plt
# Line chart
x=[5,10,15,20,25]
plt.plot(x,[30,55,90,129,165],label='India')
plt.plot(x,[25,70,90,120,140],label='Sri Lanka')
plt.xlabel('Overs'); plt.ylabel('Score'); plt.legend(); plt.show()
# Bar chart
plt.bar(['A','B','C','D'],[80,90,75,85]); plt.show()
# Pie chart
plt.pie([315,130,245,210],labels=['A','B','C','D'],autopct='%1.1f%%')
plt.show()
```

Result

Line, bar and pie charts are generated successfully.

Note: For CSV programs, keep the named CSV file in the same folder and check that column names match.
