EXPERIMENT 4

CS23334 – FUNDAMENTALS OF DATA SCIENCE LAB

Word Frequency in Text

Aim: Tokenize text and count the frequency of words.

Python Program

```
import nltk
from nltk.tokenize import word_tokenize
from nltk.corpus import gutenberg
from collections import Counter
nltk.download('gutenberg')
nltk.download('punkt')
nltk.download('punkt_tab')
text=gutenberg.raw('austen-emma.txt')
words=word_tokenize(text)
print(Counter(words).most_common(10))
```

Result

The ten most frequent tokens and their counts are displayed.

Note: For CSV programs, keep the named CSV file in the same folder and check that column names match.
